

ACTIVITY EXAMPLES

- **Incredible Journey:** Role play the effects of the water cycle.
- **Stream Sense:** Explore natural areas to learn that there is more to nature than meets the eye.

"[Students] enjoyed the activities and hands-on part of the lessons. The discussion was rich and they were able to ask questions and soak in the new information easily." - 2024 4th grade teacher about Stream Sense and Incredible Journey

- **The Life Box:** Discover the four essential factors needed to sustain life.
- **Would You Drink This Water:** Can senses determine water quality?
- **Other activities** available include topics on wetlands, fish identification, parts of a fish, knot tying, trees and more!

- To learn more and check out: riverkeepers.org/projects-activities/activity-tote-checkout/

Activity Examples

Here are a few of many activities available:

- **Blue River:** Simulate the movement of water through a watershed. Role play the effects of the water cycle on water quality between the natural and human constructed systems.
- **H2O Olympics:** Compete in games to investigate the physical properties of water.

"Fun! So many of my kids want to try these experiments at home." - 2024 4th grade teacher about H2O Olympics

- **River Crime Lab:** Become a detective and solve the crime of trash in the Red River.
- **Invaders!:** Simulate a competition for habitat and resources while learning about aquatic invasive species.
